MS Project 2007 - Advanced

Introduction:

This course aims to increase your productivity by providing the skills and knowledge to use some of the more advanced features of Microsoft Project 2007 effectively. This includes custom views, filter techniques, templates, exporting data, multiple projects and linked projects.

Learning Outcomes:

At the completion of this courseware participants will be able to:

- Work with the various views and create custom views
- Work with the various table and filter techniques
- Use, create and modify project templates
- Export data from Project to other applications
- Work with the predefined reports and create new custom reports
- Create Web pages based on Project data
- Work with multiple project files simultaneously and create workspaces
- Work with linked projects
- Work with shared resources where more than one project uses the same resource pool
- Successfully break large project files down into more manageable chunks
- Create and use macros in Project

Course Content:

- Project Views
- More Tables & Filters
- Templates
- Other Applications
- Reporting Techniques
- Presenting Projects
- Multiple Files
- Linked Projects
- Shared Resources
- Downsizing A Project
- Project VBA

Target Audience:

This course is intended for people who have used or are using Microsoft Project and wish to improve their knowledge and skills in the use of the software.

Duration:

2 Days

Courseware:

High quality learning materials are available for purchase by participants. Participants will also be presented with a certificate of achievement upon completion of the course.
